

Word FRENZY

OFFICIAL Tournament RULES

Word FRENZY can be played with large groups with our tournament rules. The beauty is everyone plays the entire time. No one sits out to wait for a winner.

Set Up

- All Official Word FRENZY rules apply.
- Determine how many tables are need to accommodate everyone playing. 8 players maximum at a table.
- You will need one Word FRENZY game for each table. FRENZY Prize sets are also recommended but not required. You may use any safe household item, like spoons.
- Assign numbers to all tables with #1 being the Head Table. The Head Table will begin each round. Players who get the word and miss a prize will move to a different table after each round. This moves players around creating a great party atmosphere.
- Assign starting seats in any way you choose. Tables do not have any barring on the scoring. The Head Table will begin each round for all tables.

That's it. You are ready to begin.

Play

- Begin the tournament. Place FRENZY Prizes in the center of each table. One less than the number of players.
- Each table must draw a Category Card and choose a category.
- The dealer at each table should pass five cards to every player. No one may look at their cards until the dealer at the Head Tables shouts "GO!"
- Each table plays the round as instructed in the Official FRENZY Rules.
- After all tables have completed and scored their round, the players at each table who got the word and missed a prize will move up to the next table in chronological order. Players at the Head Table will move to the highest table in chronological order.

Example: You have 4 tables in your tournament. After each round players would move as follows:

***Players from table 4 would move to table 3. Table 3 to table 2.
Table 2 to table 1. Table 1 to table 4.***

Winning the Tournament

The Word FRENZY Tournament ends when one player spells FRENZY in their Prize Score. Players total their points with the player with the highest score winning.

Ties

If there are more than one player with the same highest score, the play a sudden death round. After every round the player who misses a prize gets eliminated until one player remains.

It's a wild and crazy time for everyone.
